No. 4630. This is a double star. The components are not separable and are measured as one mass. The 20s images show the components to be separated by about + ·0167 and − ·0050 in the x and y co-ordinates respectively.

1 *réseau* interval represents very nearly 5′ = 127s·8 of R.A. at Dec. + 81°, and 143s·7 at Dec. + 82°.

No. 1786. This is a double star. The components are not separable, and are measured as one mass. The 20s images on Plate 4409 show the components to be separated by about + ·0070 and − ·0030 in the x and y co-ordinates respectively.

1 *réseau* interval represents very nearly $5' = 143^s{\cdot}7$ of R.A. at Dec. + 82°, and $164^s{\cdot}1$ at Dec. + 83°.

ZONE + 82°.

Plates 4103 and 4088. No. 3945. This is a double star; the components are not separable, and are measured as one mass. Measures of the 20s images on plate 4103 show that the components are separated by about − ·0060 and + ·0050 in the *x* and *y* co-ordinates respectively. Plate 4103. Nos. 4017, 4018. Measured as one mass.

1 *réseau* interval represents very nearly 5′ = 143s·7 of R.A. at Dec. + 82°, and 164s·1 at Dec. + 83°.

ZONE + 82°.

No. 861. This is a double star measured as one mass. The 3m images on plate 6412 show that the components are separated by about + ·0010 and + ·0040 in the x and y co-ordinates respectively.

1 *réseau* interval represents very nearly 5′ = 164s·1 of R.A. at Dec. + 83°, and 191s·3 at Dec. + 84°.

ZONE + 83°.

No. 1569. This is a double star. The components are not separable, and are measured as one mass. The 20s images on Plate 4876 show the components to be separated by about + ·0030 and + ·0100 in the *x* and *y* co-ordinates respectively.

1 *réseau* interval represents very nearly 5′ = 164s·1 of R.A. at Dec. + 83°, and 191s·3 at Dec. + 84°.

Plate 4466. The 3m image of B. D. 84°·289 coincides with the 6m image of B. D. 84°·290. The measure of 84°·290 depends therefore on the 3m image, and the measure of diameter is to be considered as approximate.

No. 338. B. D. 86° 67. This appears to be a double star. The components are not separable and are measured as one mass.

1 *réseau* interval represents very nearly $5' = 286^s{\cdot}7$ of R.A. at Dec. + 86°, and $382^s{\cdot}1$ at Dec. + 87°.

ZONE + 86°.

POLAR CAP.

For the plates covering the region within 3° of the Pole, the method of measurement in the duplex micrometer adopted for the lower zones was so far modified that each plate was measured by itself. This applies to the upper halves of the plates with centres at declination +87° and the whole of each of the plates with centres at declination 88°, 89° and at the Pole.

The stars on each plate were numbered separately, and the plates were afterwards compared with those adjacent. The corresponding reference numbers on these plates are given for each star in separate columns, the plates on which it appears being defined by the R.A. and Dec. of the centres. In the column headed "Zone 86°" is given the ordinal number in that Zone for stars already numbered under "Zone 86°." In this column and in some cases in other columns there are also given reference numbers for which space was not available in another column. In these cases the plate referred to is indicated in a footnote.

THE POLE.

Five plates of the region immediately surrounding the Pole were available for measurement, the central *réseau* lines, in the direction of decreasing values of y from the centre, having Right Ascension respectively 0h, 6h, 12h, 18h and 0h. The measures of these are given in the following pages, and here the system of reference numbers is altered.

As Plate 6497, R.A. 12h 0m shows more stars than any of the other plates, the stars are arranged in their order on that plate, in zones of 1 *réseau*-interval in y (from 1 to 26) and in order of increasing x in each zone, on the same system as has been followed throughout.

In the last column but one is given the number of the star on the plate shown in the heading of that column or indicated in the footnotes, and by reference to this plate in the preceding pages, the numbers of all the plates on which the star occurs may be found.
